The "Mould" Formula

In an unplayed match both teams will receive 0 VPs
However, when one team is at fault the non-offending side receives:-
15 + (difference in averages between the two teams) subject to a maximum of 30 and a minimum of 15.
The offending side will receive 0 VPs

In extenuating circumstances the offending team might receive the lowest of either:

- 10
- the team's average,
- 15 + the team's average minus the opposition's average.

Thanks to **Alan Mould** for this formula
